MEMORANDUM FOR: Acting Chief, Imagery Exploitation
Group, NPIC

SUBJECT : 1540 Split Format Light Table

REFERENCE : a) 25 November 1968
b) 25 October 1968

I have had conversations, this date, with [redacted] who was the originator of reference b). [redacted] has assured me that there has been no change in the schedule for test and evaluation, contract negotiation and contract letting for the 1540 Split Format Light Table. Thus, assuming the prototype is received 1 February 1969, production would commence 1 June 1969. Further, this assumes that the prototype model requires little modification. However, in the event of modification it may be advisable to negotiate a parallel contract for such modifications in which case you could continue to receive the required equipment some of which may be unmodified.

[redacted]
Chief, Plans and Programs Division
PPBS/NPIC
